IN THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the

application:

Listing of Claims:

1.(Currently Amended) A method for recording content on a record medium that

contains a desired content descriptor of the content, the method comprising the acts of:

storing said desired content descriptor on said record medium by a first device;

reading said desired content descriptor from said record medium by a second device

local to a user of the record medium, wherein the first device is remote from the local

device, and wherein the first device is associated with a provider of the record medium and

is different from the second device;

scanning by the second device the content of at least one multimedia source for

desired content that matches said desired content descriptor; and

recording by the second device said desired content on said record medium,

wherein said desired content descriptor is already contained in a blank of said record

medium, wherein inserting the record medium containing the desired content descriptor into

a recording the second device triggers the recording second device to automatically

perform the acts of scanning and recording.

Claims 2-3 (Canceled)

4.(Previously Presented) The method according to claim 1, wherein said desired content descriptor contained in said record medium cannot be further altered or augmented.

5.(Previously Presented) The method according to claim 1, wherein said desired content descriptor contained in said record medium can be further altered and augmented.

6.(Previously Presented) The method according to claim 1, wherein said desired content descriptor can be transferred from said record medium to a record medium of the same type or to a record medium of a different type.

7.(Previously Presented) The method according to claim 1, wherein said record medium is suited for electric and/or magnetic and/or optic recording of content.

8.(Previously Presented) The method according to claim 1, wherein said desired content descriptor is a keyword or a list of keywords.

9.(Previously Presented) The method according to claim 1, wherein said desired content descriptor obeys a pre-defined content description format.

10.(Previously Presented) The method according to claim 1, wherein said desired content descriptor comprises multimedia samples.

11.(Previously Presented) The method according to claim 1, wherein said desired content descriptor is a pre-defined content descriptor.

12.(Previously Presented) The method according to claim 1, wherein said desired content descriptor is defined by the user of said method.

13.(Previously Presented) The method according to claim 1, wherein said content from at least one multimedia source comprises image and/or audio and/or text information.

14.(Previously Presented) The method according to claim 1, wherein said at least one multimedia source is a receiver for television and/or radio programs.

15.(Previously Presented) The method according to claim 1, wherein said at least

one multimedia source is a device that is connected to a computer network, in particular to the internet.

16.(Previously Presented) The method according to claim 13, wherein said act of scanning the content of said at least one multimedia source for said desired content comprises image and/or audio and/or word processing.

17.(Previously Presented) The method according to claim 1, wherein said act of scanning the content of said at least one multimedia source for said desired content is performed dynamically depending on the available amount of content and/or on the already recorded content.

18.(Previously Presented) A machine-readable medium embodying a computer program, the computer program when executed by a processor is configured to perform the acts of claim 1.

Claims 19-22 (Canceled)

23.(New) The method of claim 1, wherein the provider comprises a manufacturer of the record medium.

24.(New) The method of claim 1, wherein the desired content descriptor is already

contained in a blank of the record medium before the user has recorded any information on

the record medium.
